

# AX-EP-EM1

Emergency Stop Button

# AXIO

## Product overview

The Axio AX-EP-EM1 range of emergency stop buttons are for use in the manual shut down of systems. The units incorporate a normally closed switch. A push of the knob latches the switch in to an open position. The switch is released again by either a twist of the knob or a turn of the key, according to the unit type.

## Features

- IP65 housing in yellow with 40mm diameter red button
- 6A at 240Vac rating

## Installation

The AX-EP-EM1 should be installed by a suitably qualified technician in conjunction with any guidelines for the equipment it is to be connected to and any local regulations. Field wiring should be installed to satisfy the requirements set out by the manufacturer of the equipment that the module is being connected to.

Knock-out holes are positioned at the top and bottom of the base for appropriate cable entry.

Every effort has been taken in the production of this data sheet to ensure accuracy. Axio do not accept responsibility for any damage, expense, injury, loss or consequential loss resulting from any errors or omissions. Axio has a policy of continuous improvement and reserves the right to change this specification without notice.
