

Product Overview

The AX-LSPTA range of Pressure Transmitters are a cost effective pressure monitoring solution for liquids and non-aggressive, non-combustible gases. The units are available in a number of different ranges with either 4-20mA or 0-10Vdc output signals. Mechanical connection is via a 1/4" BSP male thread and electrical connection is made via a one metre flying lead cable.

Features

- Robust 316L stainless steel construction
- 1/4" BSP male connection
- 0-10Vdc and 4-20mA variants
- Complete with 1m cable

Product Specifications

Range:	500mBar to 30Bar (higher ranges available upon request)	
Over Pressure:	300% FS (<70kPa), 200% FS (<10MPa)	
Power Supply:	4-20mA unit, 2-wire	0-10Vdc unit, 3-wire
Output Load:	12-36Vdc	15-36Vdc
Accuracy:	$\pm 0.25\%$ typical, $\pm 0.5\%$ Full Scale	
Pressure Connection:	1/4" BSP	
Electrical Connection:	1m Cable	
Material:	316L Stainless Steel	
Operating Temperature:	-20°C to +85°C	
Dimensions:	67(L) x 24mm Ø (max.)	
Weight:	145grams	
Protection:	IP65	
Approvals:	CE	

Order Codes

Current Output 4-20mA	Voltage Output 0-10V	
AX-LSPTA-I-500m	AX-LSPTA-V-500m	Static Pressure Transmitter 0 to 500mbar
AX-LSPTA-I-1	AX-LSPTA-V-1	Static Pressure Transmitter 0 to 1bar
AX-LSPTA-I-2.5	AX-LSPTA-V-2.5	Static Pressure Transmitter 0 to 2.5bar
AX-LSPTA-I-4	AX-LSPTA-V-4	Static Pressure Transmitter 0 to 4bar
AX-LSPTA-I-6	AX-LSPTA-V-6	Static Pressure Transmitter 0 to 6bar
AX-LSPTA-I-10	AX-LSPTA-V-10	Static Pressure Transmitter 0 to 10bar
AX-LSPTA-I-16	AX-LSPTA-V-16	Static Pressure Transmitter 0 to 16bar
AX-LSPTA-I-25	AX-LSPTA-V-25	Static Pressure Transmitter 0 to 25bar
AX-LSPTA-I-30	AX-LSPTA-V-30	Static Pressure Transmitter 0 to 30bar

Installation

These transmitters should be installed by a suitably qualified technician in accordance with prevailing regulations and any guidelines for the equipment to which it is to be connected. These units are not suitable for use with mains voltage.

These transmitters are for use in systems under pressure and should be installed in accordance with practices relevant to the intended use only by persons qualified to do so. A typical use might be an LPHW system where the transmitter would be screwed directly into a 1/4" BSP socket in steel pipework using a sealing compound around the thread if appropriate. A hexagonal surface is cast into the body for turning the unit using a spanner. Gripping devices such as stilson wrenches or swan neck pliers must not be used on the smooth cylindrical part of the body as this can damage the transmitter.
