Annicom, Founded In 1983 A Brief History

Thanks to the continued support of our customers and suppliers, Annicom has entered it's 5th decade of trading.

Annicom's main products were Control Panel design and build for HVAC, Coal Mines and Bauxite Mines worldwide. Our first order was from Carrier.

Annicom began designing and producing OEM electronic products for a variety of industries. This quickly became the core of our business as gradually many UK coal mines were closed. Our unique approach to problem solving and forward thinking enabled our rapid growth.

Annicom introduced Annicom Cross Platform IO products and the AXIO brand. In addition we manufactured and designed almost all of our UK competitors IO modules and Thyristor controls.

2015: Annicom opened it's UAE warehouse and offices which are now located in Ajman, enabling faster delivery, lower freight cost and local engineering support for our UAE/GCC customers.

Over the years Annicom has acquired a number of businesses in the UK and now has four manufacturing plants in the UK.

This brochure features a selection of our most recently launched, and most popular products.

As AXIO has continued to evolve we have remained true to the values we know are important to you; innovative and flexible design, truly British made products, from concept to manufacture, and most importantly that demonstrate our passion and commitment to develop excellent Peripherals and Control Devices.

Thanks to you, our customers, AXIO continues to bring you the best of British engineering and manufacturing at very competitive prices.
